

# Technology & Software Knowledge

Linux, Windows, MAC, IOS, Android, Citrix, PHP, Linux, Unix, AS400, Web sphere, Nutanix, hyper-converged architecture, VMWare, NetApp, EMC, Apache, Freedcamp, Github, Slack, Google Glass Development, project management software Freedcamp, IPX/SPX, PPP/SLIP, LAN/WAN routers & switches, Microsoft Office, Video streaming, AR/VR, Image recognition, AI, Big Data, SWARM, IPFS, Blockchain, Successful ICO launch, Smart contracts, Ethereum "private" contracts, Hyper-ledger, Patenting.

## Professional Experience

### CompEx Inc. / Mobius, Lewis Center, Ohio

**President / Owner 1997-present**

Business owner and manager of custom software development projects.

- Established trusting and collaborative relationships with clients by initiating requirements discovery and presenting a solution for their needs.
- Managed a team of software developers and graphic artists in web site development, web based software development, and mobile software development fostering a cohesive team environment.
- Planned, executed, monitored and managed projects using an agile methodology to accomplish project objectives to the customer's satisfaction
- Approved hardware purchases and partnered with third party vendors for hardware integrations.
- Managed development projects across a variety of industry sectors including:
  - A software system to maximize government reimbursement of medical expenses based on specific metrics for a nursing home consulting company.
  - Video streaming of motorcycle races for American Motorcycle Association on their website.
  - An online ordering system for Donatos Pizza.
  - A route optimization program to pick up laboratory specimens from medical offices for Lab Corp.
  - A subscriber and corporate calendar/information portal highlighting significant scientific research for Chemical Abstracts.
  - A mobile payment app.
  - An image recognition platform for creating mobile marketing campaigns.
  - A Warehouse Management System for Benchmark Education.

### CheckFree Corporation, Columbus, Ohio

**Senior Network Engineer 1996 - 1997**

Managed the data network and the integration of client banks.

- Managed the corporate IT infrastructure, standardization and tracking of server and PC hardware and support.
- Approved vendor selection and implemented corporate data network encryption standards for data security.
- Worked with software developers to design a system to automate and standardize work flow procedures and implementation processes between AT&T, Comdisco Network Services, and bank clients using Lotus Notes and Group Ware.
- Helped implement designs for frame-relay network connectivity solutions between large banks and Checkfree's back end e-commerce processes.
- Provided pre-sale customer connectivity solutions for integration into Checkfree's data network.

Involved in price negotiations with vendors and relationship management functions.
